

AI Use Declaration Form

Course: Introduction to Artificial Intelligence

Lab Title: Lab 4: LLMs and Prompt Engineering for Decision Support

Student Name: Aluong Leek Alier Leek

Student ID: 78152028

GitHub Repository Link: https://github.com/aluongleekalierleek/lab-4-llm-decision-support.git

Date Submitted: 16/08/2026

1. AI Use Summary

Question	Student Response
Did you use any AI tool for this lab?	yes
Estimated percentage of the work influenced by AI	20%
Did you attach evidence of AI use where applicable?	Yes

2. Details of AI Use

Complete the table below for each AI tool used. Add more rows where necessary.

Name of AI Tool Used	Purpose for Using the Tool	Prompt or Instruction Given to the Tool	Part(s) of the Work Influenced by the Tool	How I Verified, Edited, or Improved the AI Output
Gemini	I used AI to understand how to write the ask_llm function. I wanted to learn the difference between returning the whole object and returning only the text.	Can you help me understand the llm function, please, like you are teaching a kid?	The AI helped me with the function definition and the return line. It showed me that .message gives the object, but .message.Content gives the text.	I tested with a simple prompt like "What is 2 + 2?". The wrong code gave the object. I changed it to .message.content and added a print line for usage. This made the function correct and clear.
Gemini				

3. Attachment of AI Output Evidence

Where required, attach evidence of AI use. Tick all that apply. Add more rows where necessary.

Evidence Type	Attached? (Yes, No, N/A)	File Name
AI-generated draft		 <pre>def ask_llm(user_prompt, system_prompt="You are a helpful assistant"): temperature=0.7, max_tokens=500): response = client.chat.completions.create(model=MODEL, messages=[{"role": "system", "content": system_prompt}, {"role": "user", "content": user_prompt},], temperature=temperature, max_tokens=max_tokens,) return response.choices[0].message # returns the whole object</pre>
Prompt history		
Screenshot of AI interaction		 Can you help me understand by explaining what is wrong with this I can have a full understanding of it please
Exported AI conversation		
AI-generated code snippet		

Revised version showing student input		<pre>def ask_llm(user_prompt, system_prompt="You are a helpful assistant", temperature=0.7, max_tokens=500): response = client.chat.completions.create(model=MODEL, messages=[{"role": "system", "content": system_prompt}, {"role": "user", "content": user_prompt},], temperature=temperature, max_tokens=max_tokens,) print("Usage:", response.usage) # tracks token usage return response.choices[0].message.content # returns only the first choice</pre>
---	--	--

4. Student Declaration

I declare that:

Declaration Statement	Response (Yes/No)
The submitted work is my own work.	yes
Any use of AI tools has been clearly declared in this form.	yes
The prompts, instructions, and AI-generated outputs have been disclosed where applicable.	yes
I reviewed, tested, edited, and improved any AI-generated content before submission.	yes
My AI usage does not exceed 25% of the entire work.	yes
I understand that undeclared or excessive AI use may be treated as academic misconduct.	yes
